---

## EXPERIENCE

### MERCEDES-BENZ RESEARCH AND DEVELOPMENT

DECEMBER 2021 - PRESENT

#### Software Developer

- I am on the front end team that builds a dashboard to manage and track all after sales car information
- Re Designed Web Components
- Closely working with the backend team to create the best possible user experience
- Understood complex codes, adapted quickly and sorted pending bug.

**Technologies:** Angular, JavaScript, Figma

---

### L&T INFOTECH

NOVEMBER 2019 - DECEMBER 2021

#### Software Engineer

- Worked closely with design, product management, and development teams to create elegant, usable, responsive and interactive interfaces across multiple devices.
- Turned UI/UX designs into prototypes, creating awesome interactions from designs, writing reusable content modules and maintainability of the code.
- Designed and Developed the Frontend side of the Integrated Assessment Platform single-handedly in 48 hours.
- Led a team of 4 to develop a strategic web application for recruiting candidates, identifying job criticality and opportunities which decreases workflow up to 30%.
- Conceptualized original ideas that bring simplicity, best data visualization and user-friendliness to reduce complex workload.
- Re-Designed and developed the Frontend side of ACE (Automation COE Center of Excellence) Portal.

**Technologies:** Angular, Liferay, Java, Figma, Adobe XD

---
